

Washbasin cleaner with micro-organisms

Article no. 74-10

Product: The METAFLUX Basin Cleaner cleans water based and removes everyday dirt, especially oil, grease and dirt particles from workpieces such as tools. By using the brush METAFLUX basin and by the microorganisms contained a long service life of the cleaning medium is ensured. The washstand filters larger particles out of the medium and the microorganisms decompose the incorporated oils and fats.

The medium does not attack the surfaces of the parts to be cleaned, special corrosion inhibitors guarantee temporary protection after cleaning.

The surfactants contained were selected on the basis of renewable resources. The skin compatibility has also been dermatologically tested and provides improved skin protection. A fresh apple scent provides a pleasant clean the parts washer.

Product features:

Application:

- for use in Metaflux brush basin compact (Product No. 84-1000)
- for cleaning and degreasing of small parts
- Use in workshops, industry and service
- optimally adjusted to everyday soiling

Advantages:

- long service life (up to 8 months)
- fresh smell - like apple
- exempt according VOC. 2010/75 / EU
- **No identifying marks (CLP)**
- residue
- environmentally friendly
- **very efficient and economical**
- to the use of solvents can be dispensed with
- characterized advantage during transport and storage

Material: Stainless steel, plastic, painted surfaces, steel, galvanized surfaces

Pollution: Abrasion and grinding dust, grease, slight corrosion protection, smoke, soot, oil, release agents

Check material compatibility with: Aluminum, brass, rubber

Safety instructions: Follow the instructions on the label, non-flammable

Packaging:	74-1020	20 liter canister
Subject to change!	74-1080	80 (4x20) -L-canister
