ADVANCED SOLUTIONS FOR SURFACES

THE BEST OF EUROPEAN AND AMERICAN BRANDS FOR NORTH AMERICA

The triumphant march of the new aerosol technology began in Europe in 1955, with the first businesses being established specifically to manufacture sprays. For the next 20 years, this new sector concentrated on putting existing liquids and active ingredients into spray cans.

In 1975, the Swiss company METAFLUX AG brought out a completely new design of spray, one which for the first time ever enabled problem-free coating of steel with zinc, achieving quality levels that exceeded all international standards.

In the years that followed, METAFLUX took the development of metallic sprays further, using aluminium, stainless steel, brass, copper and titanium for surface coating and also developing metal-containing lubricating pastes. At the same time, the German METAFLUX sales organisation TECHNO-SERVICE GmbH in Bielefeld was being developed; the company has steadily adapted its office and storage areas to the expanding capacity requirements of its domestic and export business.

As recently as 2007, the logistics centre was expanded to accommodate an additional 150 pallet bays. Today, two aerosol factories affiliated with METAFLUX AG apply their experience, gained from over 50 years and an annual capacity of 60-70 million cans, to ensure consistently high quality.

The METAFLUX product range comprises over 75 sprays developed in-house, and every year sees fresh innovations added to it. But one constant in all METAFLUX development is the emphasis placed on these three principles:

- The highest possible technical quality
- The lowest possible air contamination in the work-place
- Maximum consideration for the environment

Strict respect for these principles guarantees that METAFLUX sprays will continue to be an internationally leading product range going forward.

The combination of German and Swiss production and marketing companies creates an international brand with an emphasis on three principles worldwide:

- The highest possible technical quality
- A comprehensive production programme
- Individual customer advice and support

Metaflux products repay the investment many times over. Experience our high standards for yourself, and draw inspiration from this catalogue for any of the following:

- Metallic coatings • Lubricants • Multifunction sprays • Welding protection • Upkeep • Maintenance • Cleaning

We are pleased to offer on-site advice and assistance – just call us in! Our outstandingly-trained technical consultants will be pleased to present our full range of products to you naturally, without obligation.

The principle behind the spray can...

The principle behind the spray can is as simple as it is inspired: using the internal pressure of the spray can, its contents are released as an aerosol precisely at the time you press on the button.

The secret of how it works lies in the mix of the active ingredient (the actual product) and the liquid propellant inside the spray can: for this, one part of the propellant is dissolved in the active ingredient, and a second part sits as a gas like a "pressure pad" above the ingredient-propellant mix.

If the button is depressed, the gas propellant forces the contents through the valve to the outside. At that instant, the propellant vaporizes in fractions of a second, and the active ingredient that is left behind is distributed very finely and evenly – just the way the user needs to have his product.

The fineness of these drops is only achieved using spray cans: the active ingredient is applied finely, economically and evenly and dries rapidly. Pump sprays cannot achieve these unique properties of aerosols, and are therefore unsuitable for many products.

How a spray can is assembled?

The basic component is generally a metal container: the actual spray can itself, in tinsplate or aluminium. The base of this can is concave, for two reasons:

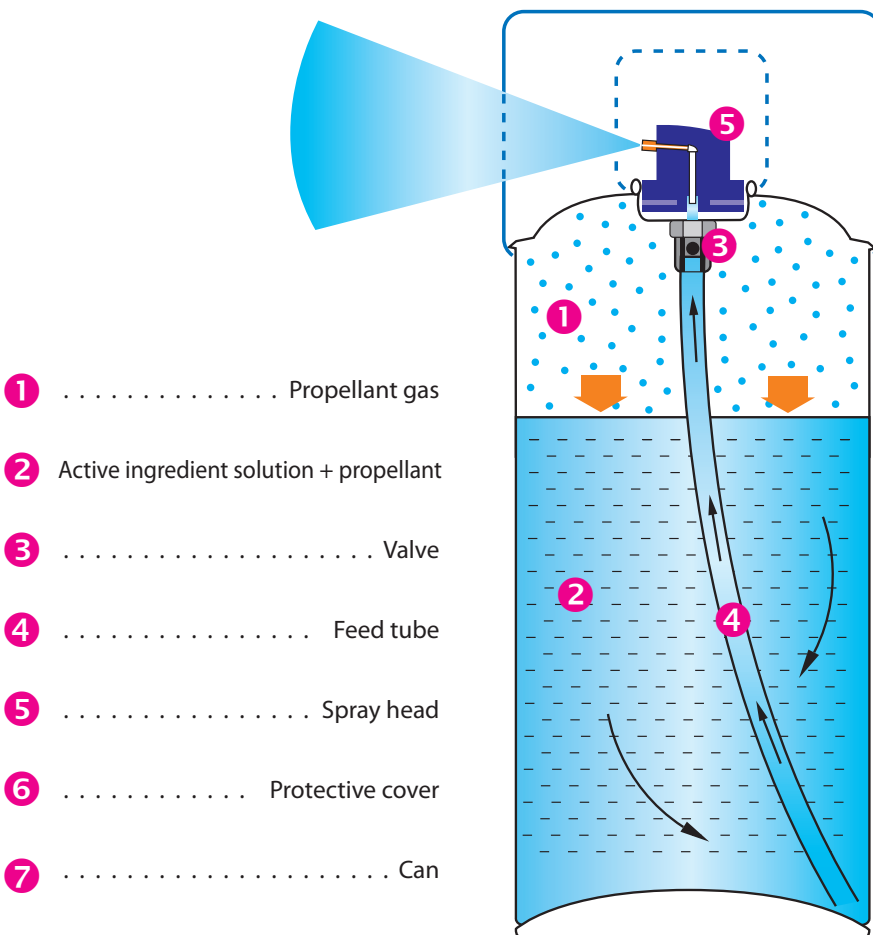

- For safety reasons: if overpressure is generated due to the strong influence of heat, it allows the base to bend outwards and thus alleviate the pressure. It means that the integrity of the spray can is not compromised despite the overpressure.

- For efficient use of the product: the vertical feeder tube running down the base against the inner wall of the can is able to reach the very last drops of the product when the base itself is concave. The valve, the spray head and the protective cover are located at the top of the metal container: the valve and spray head are responsible for "atomising" the product and for precise dosing.

The spray head is provided with a protective cover. The valve body is connected to a vertical feeder tube leading into the inside of the spray can. It extends down to the base and ensures that the can is emptied completely and evenly.

The gas phase inside the can also serves as an expansion space. This ensures that the filled aerosol can can even with-stand temperatures up to +50 °C. An essential element in aerosols is the liquid propellant or propellant gas, since this generates the pressure needed for spraying.

And ultimately, the even the most sophisticated design would be nothing without the product. The active ingredient which is intended for spraying is similarly in liquid form and is mixed with the propellant or propellant gas in the can.

IMPORTANT NOTICE: All information in this brochure is based on our extensive experience, gained over many years, in the manufacture of chemical products and their application. It is also based on external and internal testing in laboratories and in practical tests conducted in-house. Due to the variety of the products and their range of possible uses, we recommend that in the specific instance the proposed application is as-sessed on the basis of your own operational experience. Technical data sheets and safety data sheets are available for all products, in each case reflecting the latest knowledge and understanding. Further to this, there are corresponding recommendations on each individual product pack. Due to the range of possible applications, neither the manufacturer nor the marketing companies domestically or in other countries give a guarantee either expressly or tacitly as to particular outcomes from use of the product and the durability of same, or for the product lifetimes.

METALLIC COATING

- Since 1955 Metaflux represents worldwide the maximum expression of aerosol and paste metallic coating technology with the lowest possible environmental contamination
- Metaflux was the first company in the world to produce zinc in aerosol
- Pure zinc, aluminum, copper and brass in suspension provide compelling quality coatings exceeding all international standards
- 99% pure zinc in aerosol or paste suspension represents the best available long-term metallic protection against corrosion ever
- Since 1975 Metaflux metallic coating spray cans work all the time with no purging necessary

Metatflux[®]

ZINC PASTE

Cold galvanizing compound

Being the creator of galvanizing and recognized worldwide since 1955, Metaflux Zinc Paste is a high quality coating with a dry film purity of (96% + -1%) and (98.5% -99%) pure Zinc, thus providing cathodic protection against corrosion especially exposed to the climate and extreme weather conditions. Zinc is the only coating offering double protection to steel, barrier protection and galvanic protection.

Metaflux offers the format of 500g. (70-4050) and the 1 kg format with an integrated brush (70-4002) the only company in the world to offer these options. Also providing 1 kg (70-4001) 10 kgs (70-4010) and spray (70-45)

Metaflux is unquestionably the leader in the field of long-term corrosion protection and was the first company to manufacture aerosol zinc. This product has been specially designed for retouching galvanized parts and protecting metal surfaces. Used in the following fields: Agricultural Machinery - Port Facility - Deck Structures - Stair ramps and many more.

PROPERTIES:

- Can be used as a single coating or repainted.
- Same advantages as conventional galvanizing.
- Can be diluted with the product 70-6301 thinner.
- Waterproof, bonded and resistant product.
- Resistant to temperatures up to 800°C.
- Mat Gray color no. 16314 (Standard FED-STD-595B)
- Resistant to salt, salt water, acid rain and corrosion.
- Quickly dries and can be applied in a single layer up to 150µm. · Zinc paste from Metaflux is distilled to eliminate lead.
- Can be applied on an old galvanization previously cleaned

RECOMMENDED APPLICATION CONDITIONS:

Ambient temperature (minimum - 5°C) (maximum 40°C)

We recommend the use of a solvent (White Spirit) for application at temperature between -5 °C to +5°C

Brush application - roller or spray gun.

Shelf life: 1 year open jar / closed jar 3 years.

STANDARDS:

Meets the many requirements of the standards ASTM such as:

ASTM 780 - ASTM 780-1 - ASTM B117 - ASTM 123

NATA Standards MSN 7520-99-212-4616.

Product approved by the MTQ and GUF 0412.

European GMP standards.

Standards CN / CGSB.1.181 (withdrawn).

Hydro Quebec (A2 / SN.31.101)

Metaflux meets ISO 9001- ISO 3549 and ISO 1461 standards.

Meets the standards DIN 50.976 (1980)

This information is based on the best of our knowledge and is credible. Because we have no direct or ongoing control over the manner in which the product is used/applied, it does not engage the responsibility of the manufacturer for its completeness, accuracy, and results of its use.

70-45 ZINC-SPRAY

ZINC COATING - CORROSION PROTECTION

COLD GALVANISATION

Content	Type	Art.-No	Dry film zink content	Zink purity	Temperature resistance	
400 ml	spray can	70-45	93% (+/- 1%)	98.5 - 99%	+120°C	12

- Highest quality long-term zinc coating for civil and military installations in all extreme climate and weather environments
- Used by U.K. military and NATO (NATO Stock No.7520-99-212-4616)
- Licensed for use in potable water areas / installations
- Complies with DIN 50.976 norm for touch up on galvanized surfaces

Color sample

70-46 GALV-APPRET

ZINC COATING - CORROSION PROTECTION

COLD GALVANISATION

Content	Type	Art.-No	Dry film zink content	Zink purity	Temperature resistance	
400 ml	spray can	70-46	91% (+/- 1%)	98.5 - 99%	+140°C	12

- Cathodic protection primer against corrosion
- Fast drying, Firm bond
- Smooth surface finish, Waterproof
- 400 ml [13.52 fl.oz] may coat up to 8 m² [86 ft².]
- DIN EN ISO 3549:2002

Color sample

79-06 PORTA ZINC

ZINC COATING - CORROSION PROTECTION

COLD GALVANISATION

Content	Type	Art.-No	Dry film zink content	Zink purity	Temperature resistance	
400 ml	spray can	79-06	90% (+/- 1%)	98.5 - 99%	+140°C	12

- Anti-corrosion zinc coating for most metallic surfaces
- Fast drying
- Economical in use
- Can be top coated
- 400 ml [13.52 fl.oz] may coat up to 6 m² [64 ft²] according to layer thickness

70-38 GALVA PROTECT

GALVANISATION PROTECTION

UNIQUE WATER-BASED PRODUCT

Content	Type	Art.-No	Temperature resistance	
1 kg.	pot	70-38	+ 800°C	12

- Quick drying within approx. 2 hours
- No flammable
- One single application is enough
- Easily removed by wire brushing
- Does not interfere with the galvanizing process

70-43 ZINC SHEEN

ZINC-ALU COATING - CORROSION PROTECTION

HOT GALVANISATION

Content	Type	Art.-No	Dry film zink content	Zink purity	Temperature resistance	
400 ml	spray can	70-43	90% (+/- 1%)	98.5 - 99%	+140°C	12

- Highest quality corrosion-proof zinc coating for shiny appearance
- Optimal mix, can be applied at any time
- Compound color matches with hot-dipped galvanized parts
- Coloring matches with the aging process of the material base.
- 400 ml [13.52 fl.oz.] may coat up to 8 m² [86 ft².] according to layer thickness

Color sample

70-42 ZINC-ALU

ZINC-ALU COATING - CORROSION PROTECTION

HOT GALVANISATION

Content	Type	Art.-No	Dry film zink content	Zink purity	Temperature resistance	
400 ml	spray can	70-42	83% (+/- 1%)	98.5 - 99%	+140°C	12

- Combines corrosion-proof zinc coating mixed with aluminum for shiny finish like hot dip galvanized appearance.
- 400 ml [13.52 fl.oz.] may coat up to 8 m² [86 ft².] according to layer thickness
- Drying time: 4-6 minutes according to surface and environmental humidity
- Dry to handle: after 8-12 minutes

Color sample

70-41 ALU-ZINC PASTE

ZINC-ALU COATING - CORROSION PROTECTION

HOT GALVANISATION

Content	Type	Art.-No	Dry film zink content	Zink purity	Temperature resistance	
1 l.	pot	70-4101	83% (+/- 1%)	98.5 - 99%	+500°C	12
10 l.	pot	70-4110	83% (+/- 1%)	98.5 - 99%	+500°C	1
1 l.	thinner	70-6301	N.A.	N.A.	N.A.	12

- Brush-on ready corrosion-proof zinc coating Compound with high aluminum content for high shiny finish like hot dip galvanized appearance
- Immediately drying through O2 exposure
- No capillary cracks, Can be top coated at any time
- Electrically conductive, No thinning required for airless spraying when using nozzle size 4 or 5
- 1 liter [33.80 fl.oz.] may coat up to 15 m²

Color sample

79-01 ZINC COMBI

ZINC-ALU COATING - CORROSION PROTECTION

HOT GALVANISATION

Content	Type	Art.-No	Dry film zink content	Zink purity	Temperature resistance	
400 ml	spray can	79-01	79% (+/- 1%)	98.5 - 99%	+140°C	12

- Surface conditioning and metallic coating made of ultra-brilliant zinc
- A unique mix of zinc, aluminum and resins
- Protects metallic surfaces from corrosion
- Suitable for touch ups on galvanized surfaces
- Good for spot welding
- Quick drying
- High zinc content

Color sample

70-56 SST SPRAY

SST- CORROSION PROTECTION

SHINY FINISH

Content	Type	Art.-No	Dry film SST content	Alloys	Temperature resistance	
400 ml	spray can	70-56	62%	16% Cr / 10% Ni/ 3% Mo/ 2% Mn	+300°C	12

- Metallic surface coating with extremely high stainless steel content and shiny effect
- The corrosion-resistant stainless steel coating combines the benefits of the high stainless steel alloy with those of the weatherproof artificial resins
- Highly resistant to acids and alkalis
- Alloys: Chrome 16%, Nickel 10%, Molybdenum 3%, Manganese 2%

Color sample

70-78 SST FINISH

SST - CORROSION PROTECTION

SHINY FINISH

Content	Type	Art.-No	Drying	Cover	
400 ml	spray can	70-78	fast	6-8 m ² [64-86 ft ²]	12

- Corrosion-resistant and waterproof stainless steel surface coating for a shiny finish
- Highly abrasion-resistant
- Fast drying
- 400 ml [13.52 fl.oz.] may coat up to 6-8 m² [64-86 ft²]

Color sample

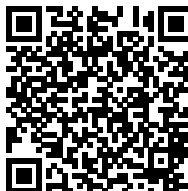

70-16 ALUMINIUM SPRAY

ALUMINIUM - CORROSION PROTECTION

SHINY FINISH

Content	Type	Art.-No	Dry film alu content	Alu purity	Temperature resistance	
400 ml	spray can	70-16	99.5%	99.5%	+800°C	12

- Ultra-fine pure aluminum lamina for smooth surface finish and cathodic
- Anti-corrosion protection up to +800°C [+1 470°F]
- Electrically conductive (spot welding)
- Thermic diffusion on steel from +825°C [+1 520°F]
- 400 ml [13.52 fl.oz.] may coat up to 8-10 m² [86-108 ft²]

Color sample

70-52 ALUMINIUM SPRAY

ALUMINIUM - CORROSION PROTECTION

SHINY FINISH

Content	Type	Art.-No	Dry film alu content	Alu purity	Temperature resistance	
400 ml	spray can	70-52	99.5%	99.5%	+800°C	12

- Extremely abrasion-resistant aluminum coating for the protection of surfaces subject to frequent manipulation or contact
- Inhibits corrosion
- Thickness at +20°C [+68°F] = 0.655 g/cm³ [0.38 oz./in³]
- 400 ml [13.52 fl.oz.] may coat up to 4-5 m² [43-54 ft²]

Color sample

70-18 CHROMAL SPRAY

CHROMAL - FINITION

CHROMAL FINISH LOOK

Content	Type	Art.-No	Thickness at 20 °C	Temperature resistance	
400 ml	spray can	70-18	0.655g/cm ³	+400°C	12

- Metallic shiny coating for surfaces (chrome effect)
- Product for professional use only
- Excellent coverage
- Thickness at +20°C [+68°F] = 0.655 g/cm³ [0.38 oz./in³]
- 400 ml [13.52 fl.oz.] may coat up to 8-10 m² [86 -108 ft²]

Color sample

70-49 WELD-COPPER SPRAY

COPPER - FINITION

SHINY FINISH

Content	Type	Art.-No	Density	Color	Cover	
400 ml	spray can	70-49	0.66 g/cm ³ to 20°C	copper	8 -10 m ² 86-108 ft ² .	12

- Copper in suspension for real high density copper coating
- Recommended for spot welding operations
- Abrasion-resistant
- Bonds with any metal and solid surfaces
- Suitable for installation and decoration works
- Economical in use
- 400 ml [13.52 fl.oz.] may coat up to 8-10 m² [86 -108 ft²]

Color sample

70-57 COPPER SPRAY

COPPER - FINITION

SHINY FINISH

Content	Type	Art.-No	Dry film copper content	Temperature resistance	Cover	
400 ml	spray can	70-57	56%	+800°C	8 -10 m ² 86-108 ft ² .	12

- Copper in suspension for real high density copper coating
- High content of copper in the dry film
- Excellent conductivity
- 400 ml [13.52 fl.oz.] may coat up to 8-10 m² [86 -108 ft²]

Color sample

70-58 BRASS SPRAY

BRASS - FINITION

SHINY FINISH

Content	Type	Art.-No	Dry film brass content	Temperature resistance	Cover	
400 ml	spray can	70-58	67%	+800°C	8 -10 m ² 86-108 ft ² .	12

- Brass in suspension for real high density brass coating
- High content of brass in the dry film
- 400 ml [13.52 fl.oz.] may coat up to 8-10 m² [86 -108 ft²]

Color sample

CORROSION PROTECTION

- Metaflux corrosion protection products are made to provide metal surfaces with a permanent shield against corrosive agents
- The active process of Metaflux corrosion protection products converts rust into a stable compound, thus allowing the treated surfaces to be top coated with no risk of new corrosion
- Unique time saving products , like Metaflux Rust-Safe Spray 70-37 and 70-44, represent examples of advanced solutions against corrosion with direct application onto rust
- The range of products offers specific protection solutions in aerosol or liquid for tools and machinery in storage or for overseas transportation
- Salt spray test results available for rust-neutralizing products

70-37 RUST-SAFE RED

AIRPROOF BARRIER AGAINST RUST

RUST-SAFE RUST BARRIER

Content	Type	Art.-No	Salt spray test	Temperature resistance	
400 ml	spray can	70-37	600 Heures	+120°C	12

- Primary and secondary corrosion protection for metal surfaces
- Excellent adhesion to clean or rusty surfaces
- Good penetration on welded areas
- Can be top coated with any paint or varnish
- Highly resistant to acids and alkalis
- Good UV stability, Airproof
- Resistant to water infiltration

Color sample

70-44 RUST-SAFE GREY

AIRPROOF BARRIER AGAINST RUST

RUST-SAFE RUST BARRIER

Content	Type	Art.-No	Salt spray test	Temperature resistance	
400 ml	spray can	70-44	600 Heures	+120°C	12

- Primary and secondary corrosion protection for metal surfaces
- Excellent adhesion to clean or rusty surfaces
- Good penetration on welded areas
- Can be top coated with any paint or varnish
- Highly resistant to acids and alkalis
- Good UV stability, Airproof

Color sample

70-63 TS-400 GREY

AIRPROOF BARRIER AGAINST RUST

RUST PROTECTION

Content	Type	Art.-No	Temperature resistance	
1 kg.	pot	70-6300	15° to 28°C	12
5 kg.	pot	70-6305	15° to 28°C	2
1 l.	Diluant	70-6301	N.A.	12

- Fast drying protective primer for all metals
- Provides reliable and permanent protection of the treated surface
- Bonds with any blank metal surface
- Can be top coated with enamel varnish

Color sample

70-35 ROST-I-SOL

AIRPROOF BARRIER AGAINST RUST

RUST CONVERTOR

Content	Type	Art.-No	Temperature resistance	
400ml.	Spray can	70-35	+175°C	12
500ml.	pot	70-3550	+175°C	12

- 90 µm layer consumption rate 1 kg = 4-5 m² [2.20 lbs. = 43-54 ft².]
- Lead-free, no-caustic patented brush-on rust neutralizer
- Can be safely cleaned after drying
- Works well on moistened rust
- Can be welded over at any time
- Does neither attack nor damage any painted or zinc surfaces
- 500 hour salt spray test according to DIN 50021 certified

* Scan the QR code of the product to see the technical data sheet and much more information. You can download the app(free) that can read QR codes on any smart phone.

70-39 CORROSION PROTECTOR WAX

AIRPROOF BARRIER AGAINST RUST

CIRE DE PROTECTION POUR ENTREPOSAGE

Content	Type	Art.-No	thickness	séchage	
400 ml	spray can	70-39	0.63 g/cm ³	70min.	12

- Long-term protection for all metallic surfaces against corrosion and oxidation
- Permanent elastic protective film protecting from atmospheric influence causing oxidation
- Water-repellent
- High capillary effect
- Excellent adhesion to all metals

75-64 KOWA PROTECT WAX

AIRPROOF BARRIER AGAINST RUST

LONG-TERM PROTECTION WAX

Content	Type	Art.-No	Temperature resistance	drying	Cover	
4 l.	pot	75-6404	-40 to +180°C	70min.	1 l. cover approx. 15 m ²	4
20 l.	pot	75-6420	-40 to +180°C	70min.		1

- Very good creep action
- Fast-drying and no-adhesive when dry
- Does not attract dust
- Can be used in the dipping bath to protect hollow bodies
- 500 hour salt spray test available

MULTIFUNCTION PRODUCTS

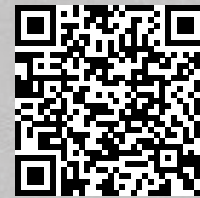

5 IN 1: PROTECTS - PENETRATES - LUBRICATES - DEHYDRATES - MAINTAINS

Extended range of applications when protecting, loosening, lubricating, dehumidifying and maintenance is required. Clean the part and apply the product. If necessary, remove residues with a cloth afterwards. Highly recommended for air gun and rifle maintenance. Prevents grass accumulation on lawn mowers. Excellent for lubricating aluminum for trouble-free punching operations.

Content	Type	Art.-No	Thickness	Temperature resistance	dielectric	
400 ml	spray can	70-17	0.718 g/cm ³	+130°C	N.A.	12
500 ml	spray can	70-1750	0.718 g/cm ³	+130°C	N.A.	12
1 l.	pot	75-3301	0.718 g/cm ³	+130°C	56 000 Volts	12
4 l.	pot	75-3304	0.718 g/cm ³	+130°C	56 000 Volts	4
20 l.	pot	75-3320	0.718 g/cm ³	+130°C	56 000 Volts	1

ADVANTAGES :

- High performance multifunction spray
- Does neither attack plastic, rubber, fabrics nor paints
- Silicone-free
- Petroleum-free
- Available in spray can, tin and barrel
- Dielectric up to 56.000 Volts (bulk liquid 75-33 ONLY)
- Works as lubricant compliant to VG 3 standard

Content	Type	Art.-No	Density	Temperature resistance	
400 ml	spray can	70-47	0.67 g/cm ³ at 20°C	-50°C to +120°C	12
500 ml	spray can	70-4750	0.67 g/cm ³ at 20°C	-50°C to +120°C	12

Extremely wide-range spray to be applied as protection film with capillary effect and dehumidifier for electric connections and systems. Can be safely applied on plastic parts, electric wires and connections, bolts and nuts as an anti-seize and corrosion proof-protection. Recommended as prevention against heavy and light winter frost on any door locks.

Benefits

- 5 highly performing products in 1: spray for electric connections, viscosity spray with capillary effect, dehumidifier for electric systems, anti-corrosion protection, preventive frost protection
- Prevents current leak in humid areas
- Provides ultra-thin viscosity to protect from corrosion
- Acts specifically to prevent formation of oxidation and sulphide layers on electric wires and connections
- Loosens seized bolts and nuts, Silicone-free, Penetrates below the water
- Prevents formation of frost in any locks, i.e. buildings, cars, trucks, mailboxes, etc.
- Does not attack neither fabric, rubber nor paints

70-97 IMPREGNATION SPRAY

WATERPROOFING PRODUCT

DURABLE PROTECTION AGAINST WATER

Contenu	Type	Art.-No	Color	
400 ml	spray can	70-97	transparent	12

Effective professional waterproofing product for the impregnation of textiles, fabrics and leather. Durable protection, preserves surfaces. Improves the strength of the materials by protecting them from damage caused by water. For waterproofing: Clothing: work clothes, anoraks, parkas, vests, suits, overalls, ties, pants, blouses, canvas shoes, suede and leather boots, rain-wear, ski wear, sports and leisurewear, briefcases and satchels.

70-19 PROTECT SPRAY

TRANSPARENT PROTECTION

REPELS DIRT

Content	Type	Art.-No	Temperature resistance	
400 ml	spray can	70-19	+100°C	12

- Transparent coating
- Smooth surface
- Repels dirt
- Permanently elastic
- No discoloration if heated or exposed to UV rays
- Does not alter thermal conductivity

70-05 TORSION SPRAY

NUT & BOLT LOOSENERS

SPECIAL PENETRATING SPRAY BY COLD ACTION

Content	Type	Art.-No	Dry in	capillarity	
400 ml	spray can	70-05	10 min.	high	12

- Extremely high capillary action
- The slightest tolerances allow the active ingredients to penetrate
- Acid and grease-free
- No residues left after approx. 10 minutes
- Can be top coated after approx. 10 minutes from application
- Its contraction effect (chemical cracking) by cooling

70-08 SUPER DEGRIP

LOOSENERS WITH ANTI-CORROSION

SPECIAL PENETRATING SPRAY WITH LUBRICATING ACTION

Content	Type	Art.-No	Thickness	Temperature resistance	
400 ml	spray can	70-08	0.803 g/cm ³	+60°C	12

- Industrial penetrating spray adding lubrication with rust protection additives
- Little quantity required, Leaves no deposit of solid particles
- Does not attack painted surfaces
- The lubrication provided by the spray eliminates the need for additional lubricating treatments with other products

* Scan the QR code of the product to see the technical data sheet and much more information. You can download the app(free) that can read QR codes on any smart phone.

70-14 LEAK SEEK SPRAY

SEAL CHECK SPRAY

FOR ALL GAS FEEDING SYSTEMS

Content	Type	Art.-No	Thickness	Temperature resistance	DVGW	
400 ml	spray can	70-14	1.000 g/cm ³	0°C to +50°C	No.84.01e 557	12

- Seal check product for all gas feeding systems
- Suitable for compressed air and all technical and medical gases
- Also suitable for combustible gases such as acetylene, propane, butane and hydrogen
- No-corrosive
- Does not attack rubber, metal or plastic
- DVGW Register No. 84.01 e 557

70-98 CRACK TESTING

CRACK DETECTION SPRAYS

CRACKS AND DEFECTS SEEK

Content	Type	Art.-No	Action		
400 ml	spray can	70-9801	cleaner	12	
400 ml	spray can	70-9802	contrastor	12	
400 ml	spray can	70-9803	revelator	12	

- All sprays are free of corrosive components
- Compliant with the following norms:
- DIN 54 152, MIL-SPEC I-25135D, LTF 6850
- Lloyds Register of shipping • Dutch Central Bureau
- Bureau Veritas • German Lloyd • Reactor construction

79-08 FREEZE SPRAY

FREEZE SPRAY

INSTANT COOLING ACTION

Content	Type	Art.-No	Thickness	
400 ml	spray can	79-08	0.56 g/cm ³	12

Economical freeze spray with instant cooling action lowering spot temperature down to -40°C [-40°F]. No odor, Safe to use on most surfaces except plastics. Removes gum and tar from cloth. Localizes faults in electrical components. Great for testing thermostats.

LUBRICANTS

- Metaflux lubricants provide outstanding lubrication and protection against corrosion all-in-one
- Metaflux titanium-based lubricant for metal in aerosol 70-81 or paste 70-85 with temperature resistance within a range of -180°C [-356°F] up to $+1\,350^{\circ}\text{C}$ [$+2\,462^{\circ}\text{F}$], represents worldwide a unique lubricant solution for high tech civil and military engineering
- Special lubricants enriched with PTFE flakes or based on special advanced formulations provide the right choice for clean industrial and professional lubrication
- With its 51 189 psi pressure resistance, Metaflux moly spray 70-82 represents an example of compelling anti-seize assembly lubricant when extreme loads are involved
- Each lubricant is available in a high quality aluminum packaging

Metaflux[®]

METAL LUBRICANT

METAL PASTE LUBRICANT HIGHEST QUALITY

Content	Type	Art.-No	Pressure resistance	Temperature resistance	
400 ml	Aerosol	70-81	2 400 kPa/cm ²	-180°C to +1 350°C	12
100ml.	gun	70-8501	2 400 kPa/cm ²	-180°C to +1 350°C	2
4 g.	bag	70-8508	2 400 kPa/cm ²	-180°C to +1 350°C	2
350 g.	pot	70-8535	2 400 kPa/cm ²	-180°C to +1 350°C	25
1 kg.	pot	70-8510	2 400 kPa/cm ²	-180°C to +1 350°C	6

Description: Improves the replacement of moving parts on CNC and milling machines. Prevents wear out, seizing and corrosion of mechanical connections, sliding parts bearing extreme loads (i.e. forklifts), reduces vibration noises (e.g. squeaking of breaks), allows removal of nuts on a damaged threading by remodeling the same. Maintains all metal and steel parts stable in volume and protected against variations induced by cold and heat. Highly recommended for all industrial fields, automotive, civil and military sea ports, water sewage plants, power plants, hospitals, civil and military constructions and installations, etc. Excellent on stainless steels.

Benefits:

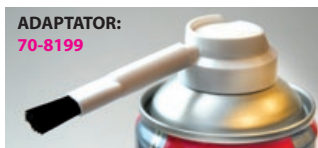

- Unique industrial heavy duty metal lubricant based on titanium to secure highest performance in all extreme conditions throughout the time
- Resistant to saltwater, water, oil, petrol, most acids, lye, gases and vapors
- Abrasion-resistant
- No-flaking if exposed to continuous heat or rinsing
- Prevents galvanic contact corrosion
- Nickel, copper and aluminum-free with no possibility of electrolyte formation

70-85 / 70-81 TITANIUM METAL LUBRICANT

**Brush for 70-8501:
item # 70-8502**

**ADAPTATOR:
70-8199**

70-82 ANTI-SEIZE

METAL LUBRICANT

PREVENTS WEAR OUT

Content	Type	Art.-No	Pressure resistance	Temperature resistance	Corrosion protection	
400 ml	spray can	70-82	3600 kPa/cm ²	-80°C to +2192°C	yes	12

- High performance assembly and separation lubricant containing metal pigments to protect against seizing and formation of corrosion
- Highly resistant to saltwater, oil, organic solvents, most acids and lye
- Aluminum-free
- Friction-resistant metallic film providing a reliable anti-corrosion barrier

70-86 CERAMICS SPRAY

METAL LUBRICANT

WHITE SEPARATING AGENT

Content	Type	Art.-No	Pressure resistance	Temp. Resistance	Abrasion resistance	
400 ml	Spray can	70-86	22 000 N/cm ²	+ 1 200°C	high	12

- White separating agent and sealant
- Abrasion-resistant
- No-flaking
- Resistant to rinsing, water, oil, petrol, most acids and lye
- Prevents electro-chemical corrosion
- Secures easy disassembly after long time

70-76 META LUBE II

METAL LUBRICANT

CLEAR GREASE SPRAY

Content	Type	Art.-No	Thickness	Temperature resistance	Color	
400 ml	spray can	70-76	0.600 g/cm ³	-20°C to +120°C	colorless	12

- Lubricant spray with active ingredients based on special grease for any high precision technology application
- No dripping
- Colorless and clean
- Water-resistant
- Skin friendly

70-83 DRI-LUBE

DRY LUBRICANT

DRY-LUBE SPRAY

Content	Type	Art.-No	Pressure resistance	Temperature resistance	Based	
400 ml	spray can	70-83	0.625 g/cm ³	-120°C to +460°C	MoS2	12

- Dry lubricant based on MoS2
- Basis for a maintenance-free running-in lubrication on machines and mechanical parts
- Clean friction coating, corrosion protection
- Constant friction coefficient
- Extremely pressure-load resistant
- Maintains its high lubricating capacity even after very long time from last application

70-88 CHAIN CLING SPRAY

CHAIN LUBRICANT

FULLY SYNTHETIC LUBRICANT

Content	Type	Art.-No	Pressure resistance	Temperature resistance	
400 ml	spray can	70-88	0.683 g/cm ³	-15°C to +250°C	12

- Fully synthetic lubricant for high speed rotating chains
- Excellent penetration and adhesion
- No dripping
- No effect on regular O-rings
- Chemically stable
- Silicone-free
- Transparent corrosion protection up to 1 year

70-07 CHAIN SPRAY

CHAIN LUBRICANT

WHEELSET & CHAIN SPRAY

Content	Type	Art.-No	Pressure resistance	Color	
400 ml	spray can	70-07	0.685 g/cm ³	noir	12

- Dark colored lubricant spray for industrial heavy duty chains and toothed wheels
- Bonds firmly with no dripping
- Resistant to water, waste water and aggressive agents
- Does cope with extremely heavy pressure loads
- Provides excellent protection against wearing and corrosion.
- Does not contain chlorine or heavy metals.
- Ideal for high and low temperatures applications (tested at -20 °C).

70-25 METAFLOX

PTFE LUBRICANT

HEAVY DUTY LUBRICANT

Content	Type	Art.-No	Density	Temperature resistance	
400 ml	spray can	70-25	0.67 g/cm ³	-50°C to +100°C	12
100 ml	spray can	70-2501	0.67 g/cm ³	-50°C to +100°C	12

- High performance lubricant spray with PTFE
- Bonds firmly with no dripping
- Good flow capacity
- Prevents freezing up
- Eliminates grating and squeaking noises
- Does neither attack rubber nor painted surfaces
- Penetrates below the moisture

70-87 PTFE-100

DRY PTFE LUBRICANT

SYNTHETIC LUBRICANT 100% PUR PTFE

Content	Type	Art.-No	Dry film PTFE content	Temperature resistance	
400 ml	spray can	70-87	100%	-60°C to +260°C	12

- Anti-stick lubricant spray for clean 100% pure PTFE coating
- Clean and colorless
- Grease-free, Firmly adheres to surface
- Dust, dirt and water repellent
- Resistant to oil, water and other liquids

* Scan the QR code of the product to see the technical data sheet and much more information. You can download the app(free) that can read QR codes on any smart phone.

70-89 HT-SUPER SPRAY + PTFE

PTFE LUBRICANT

HIGH STRAIN RESISTANT LUBRICANT

Content	Type	Art.-No	Thickness	Temperature resistance	
400 ml	spray can	70-89	0.683 g/cm ³	+30°C to +200°C	12

- High strain resistant lubricant spray enriched with PTFE flakes
- Prevents seizing and corrosion
- Optimal coverage
- Secure and fast adhesion
- Resistant to thinned lye, acids and corrosive industrial environments.

79-03 PORTA SILICON spray

SILICONE LUBRICANT

UNIVERSAL SLIDING AND SEPARATION FILM

Content	Type	Art.-No	Temperature resistance	Color	
400 ml	spray can	79-03	-40°C to +200°C	colorless	12

- Universal sliding and separation film
- Works on metallic surfaces, plastic, wood, leather and rubber
- No odor
- Protects rubber seals from drying out and cracking

79-11 PORTA ADHESION POWER

ADHESION LUBRICANT

TRANSPARENT LUBRICANT

Content	Type	Art.-No	Temperature resistance	Pressure resistance	Capillarity	
400 ml	spray can	79-11	-30°C to +200°C	haute	élevée	12

- High adherence clear lubricant made of high quality synthetic oils
- Reliable adhesion even on moving parts
- Water repellent
- Highly resistant to pressure
- High penetrating power
- High capillarity

70-06 BELT SPRAY

EXTENDS THE LIFETIME OF BELTS

BONDING AGENT AND CARE PRODUCT

Content	Type	Art.-No	Thickness	More power	Prolonged life by	
400 ml	spray can	70-06	0.715 g/cm ³	50%	100%	12

- Bonding agent and care product based on polyolefins
- Prevents surface smoothing
- Does not contain tar or resins
- Achieves performance enhancement of up to 50%
- Extends servicing intervals

GOING TO THE TOP

INDUSTRIAL QUALITY OF CUTTING FOAM PRODUCTS.

BY FAR THE BEST CUTTING FOAM IN THE INDUSTRY !!!

Universal cutting foam for any metal, from the hardest stainless steel and titanium to soft metals like copper, brass, aluminum and cast metal. Can be universally used for all cutting and working processes.

TYPICAL APPLICATIONS:

Drilling metal: spray directly onto the drill bit or the surface to be drilled
Sawing metal: spray along the cutting edge
Internal pipe thread: cutting spray clings to the work-piece.

- Prevents tarnishing on CrNi-steel and copper
- Perfectly adheres to angled surfaces
- Nitrite-free, Compatible with human skin
- No aggressive additives, No unpleasant odors
- Increases drill bit life and cutting tool times by almost 100%
- Increases the cutting performance of metal saws by up to 40%
- Thickness: 0.860 g/cm³ [0.50 oz./in³]

* Scan the QR code of the product to see the technical data sheet and much more information. You can download the app(free) that can read QR codes on any smart phone.

70-03 / 70-27 TOOL SPRAY

COOLING DRILLING FOAM

RAPIDLY CONDUCTS HEAT AWAY

Content	Type	Art.-No	Thickness	Washable?	
400 ml	spray can	70-03	0.860 g/cm ³	yes, degreaser	12
100 ml	spray can	70-0301	0.860 g/cm ³	yes, degreaser	12
50 ml	paste	71-03	N.D.	yes, degreaser	12
400 ml	spray can	70-27	0.860 g/cm ³	yes, water	12

- Prevents tarnishing on CrNi-steel and copper
- Perfectly adheres to angled surfaces
- Nitrite-free, Compatible with human skin
- No aggressive additives, No unpleasant odors
- Increases drill bit life and cutting tool times by almost 100%
- Increases the cutting performance of metal saws by up to 40%

70-01 SYNTHETIC FLUID

CUTTING FLUID

100% SYNTHETIC FLUID FOR METALS **SOLUBLE**

Content	Type	Art.-No	pH	Color	
1 l.	liquid	70-0101	8 - 8.5	green - blue	12
4 l.	liquid	70-0104	8 - 8.5	green - blue	4
20 l.	liquid	70-0120	8 - 8.5	green - blue	1
205 l.	liquid	70-0145	8 - 8.5	green - blue	1

- 100% water soluble, Low odor
- Highly resistant to bacterial contamination
- Compatible with most aluminum alloys
- Does not leave spots on machinery
- Not sticky (gummy)

75-03 / 70-02 CUTTING OIL

CUTTING OIL

SPECIAL OIL FOR METALS **SOLUBLE**

Content	Type	Art.-No	pH	Color	Origin	
1 l.	huile	75-0301	5	brown	Germany	12
4 l.	huile	75-0304	5	brown	Germany	4
20 l.	huile	75-0320	5	brown	Germany	1
1 l.	huile	70-0201	5	brown	Canada	12
4 l.	huile	70-0204	5	brown	Canada	4
20 l.	huile	70-0220	5	brown	Canada	1
205 l.	huile	70-0245	5	brown	Canada	1

- 100% water soluble
- Highly resistant to bacterial contamination
- Life span of several months
- Very soft for the hands
- Hypo allergenic in most cases
- pH value: 5.0 (pure product)

70-11 ADHESIF SPRAY

SEALANTS, FILLERS & ADHESIVE

BONDS QUICKLY

Content	Type	Art.-No	Density	Temperature resistance	
400 ml	spray can	70-11	0.705 g/cm ³	-30°C to +80°C	6

- Ideal as a large-area adhesive
- Bonds quickly
- Very good adhesive strength
- Resistant to humidity
- Practical and clean in use
- Bonds securely and firmly to the surface
- Thanks to a special spray-on dispenser valve wide areas benefit of an accurate multi-sectioned spray application
- Short-term heat resistance up to 100°C

70-30 ABRA+

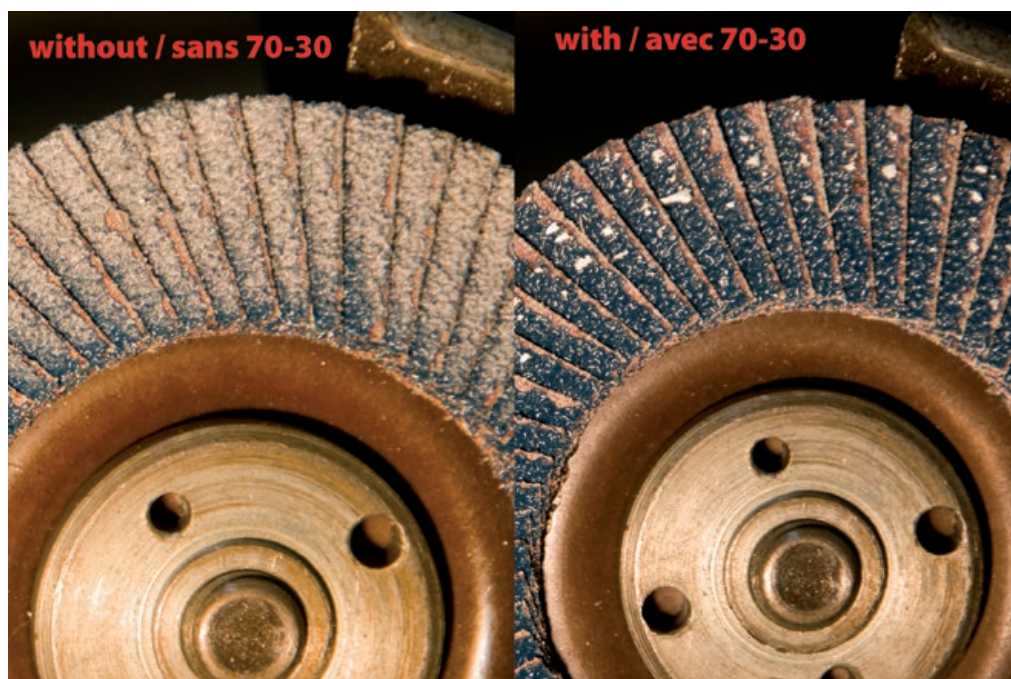

ANTI-SEIZE AGENT FOR

PROTECTION FOR COATED ABRASIVES

Content	Type	Art.-No	Thickness	
400 ml	spray can	70-30	0.715 g/cm ³	12

- Prevents seizing of the abrasive surface
- Extends lifetime of the cutting or grinding surface by several times
- Prevents overheating when grinding
- Silicone-free

* Scan the QR code of the product to see the technical data sheet and much more information. You can download the app(free) that can read QR codes on any smart phone.

70-6214 ZINNTEC

Note: Overdosing on hardener does not accelerate the hardening process, and if the 2-3% ratio is not respected, the quality may be affected.

◀ BODYWORK REPAIR

2-COMPONENT FILLER

Content	Type	Art.-No	Dry for touching	
1370g. + 30g hardener	paste	70-6214	20min	1

Zinntec is a 2-component repair filler for aluminum and steel materials, zinc, GFK, and wood. It can also be used in bodywork repairs as a high-quality replacement for lead solder.

- Resistant to vibration and impact
- Resistant to gasoline, diesel, many oils, and diluted acids
- Non-hygroscopic, shrinks without deformation
- Resistant to weather and corrosion
- No thermal deformation as it can be used cold, no disassembly of parts is necessary
- High heat resistance
- Easy to apply
- Can be sanded easily and without dust after a short drying time
- Has high adhesive and flexural strength
- Can be applied easily on vertical surfaces

70-21 MANUMASTIC

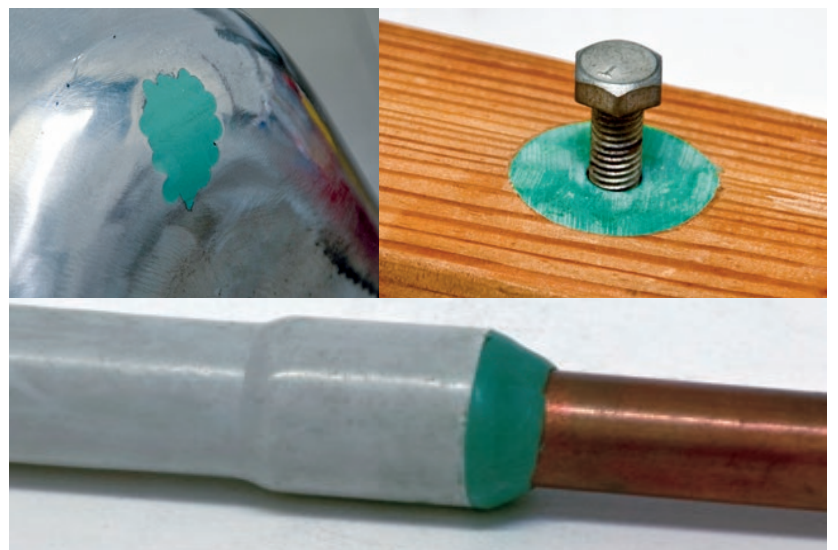

◀ SEALANTS, FILLERS & ADHESIVE

META-FILL KNEADABLE FILLER

Content	Type	Art.-No	Temperature resistance	Pressure resistance	Tension resistance	
100 g.	paste	70-2110	+200°C	7 840 N/cm ²	2 940 N/cm ²	12
400 g.	paste	70-2140	+200°C	7 840 N/cm ²	2 940 N/cm ²	

- Rapid repair epoxy resin
- Simple to apply
- Can also be used under water
- Can be top coated
- Keeps for at least 3 years (in sealed packaging)

70-04 ANTI-SPATTER

ANTI-SPATTER SPRAY

PREVENTS ADHESION OF WELD SPATTER

Content	Type	Art.-No	Thickness	Active content	
300 ml	spray can	70-04	1g/cm ³	98%	12

- Special separating agent
- Free of silicones and silicone oils
- Safe to use with galvanized products
- Can be washed off with warm water
- Unthinned active ingredient concentrate
- Very economical, No flammable
- Awarded by the German Welding

79-04 PORTA ANTI-SPATTER

ANTI-SPATTER SPRAY porta

PREVENTS ADHESION OF WELD SPATTER

Content	Type	Art.-No	Thickness	
400 ml	spray can	79-04	0.575 g/cm ³	12

- Silicone-free
- Washable with warm water
- Increases service life of jets and nozzles
- Economical to use

75-04 MULTI-TS

ANTI-SPATTER FLUID

PREVENTS ADHESION OF WELD SPATTER

Content	Type	Art.-No	pH	Color	
4 l.	liquid	75-0404	9.0	blue	4
20 l.	liquid	75-0420	9.0	blue	1
205 l.	liquid	75-0445	9.0	blue	1

- Anti-spatter fluid with temporary corrosion protection
- Can also be used as a cleaning agent and degreaser
- Prevents adhesion of weld spatter.
- Protects the work piece, the welding nozzle and the welding equipment
- No flammable

71-04 NOZZLE PASTE

NOZZLES HEAT PROTECTION

BASED ON NATURAL RAW MATERIALS

Content	Type	Art.-No	Viscosity	Color	
250 g.	paste	71-04	6.0 mm ² /s	white	12

- Nozzle cleaning grease
- Based on natural raw materials
- No dangerous thermal decomposition products
- Economical to use

* Scan the QR code of the product to see the technical data sheet and much more information. You can download the app(free) that can read QR codes on any smart phone.

70-70 THERMEX

HEAT PROTECTION PASTE

STOPS WELDING HEAT

Content	Type	Art.-No	Thickness	Temperature resistance	
2.5 kg.	paste	70-70	2 g/cm ³	up to 4000 °C	12

- Ceramic thermal protection paste
- No unnecessary disassembly
- No charring of cables and seals
- No unnecessary bur ning away of paint
- No re-galvanizing, leaves no residues
- No damage to chr ome or plastic parts
- No warping, bruising, twisting
- Can be used again for several times

76-70 GEL PROTECT

HEAT PROTECTION GEL

UNIQUE POLYMER GEL HIGH HEAT RESISTANCE

Content	Type	Art.-No	Color	Biodegradable	
1 l.	gel	76-70	colorless	yes	12

- Easy to apply
- Reduces the danger of fire
- Prevents from heat damage
- Does perfectly adhere to any vertical surface.
- Skin-friendly: no-toxic
- No-corrosive, Biodegradable

78-01 LOCK-IT MEDIUM

THREADLOCKER BLUE

MEDIUM STRENGTH RETAINER

Content	Type	Art.-No	Dry to touch	Max. strength	
10 ml.	liquid	78-0110	10 to 20 minutes	1 to 3 hours	1
50 ml.	liquid	78-0150	10 to 20 minutes	1 to 3 hours	1
250 ml.	liquid	78-0125	10 to 20 minutes	1 to 3 hours	1

- Max load up to 50 Kg [110 lbs.]
- Max. thread 6 mm to 20 mm [¼" to ¾"]
- Temp. resistance -53°C up to +148°C
- [-65°F up to +300°F]

78-02 LOCK-IT STRONG

THREADLOCKER RED

HIGH STRENGTH RETAINER

Content	Type	Art.-No	Dry to touch	Max. strength	
10 ml.	liquid	78-0210	10 to 20 minutes	1 to 3 hours	1
50 ml.	liquid	78-0250	10 to 20 minutes	1 to 3 hours	1
250 ml.	liquid	78-0225	10 to 20 minutes	1 to 3 hours	1

- Max load up to 125 Kg [275 lbs.]
- Max. thread up to 25 mm [1 in.]
- Temp. resistance -53°C up to +148°C

Metaflux®

FOOD INDUSTRY PRODUCTS WITH NSF APPROVAL

NSF is an acronym for the National Sanitation Foundation, an independent no self-interest organisation which determines standards and certification for programmes concerning public health, safety and the environment.

Previously all METAFLUX products developed for use in the food industry were certified by the USDA (US Department of Agriculture) classified as H1 or H2 products. This task is now being carried out by the NSF Registration Programme. The criteria for NSF registration are similar to the ones which were used by USDA. NSF registration is internationally recognised and respected.

Metaflux is proud to be in a position to offer NSF products, this being a part of their continued obligation to ensure safety and quality to the food industry. Year after year new items are introduced into our product range, but these too adhere to the same METAFLUX principles: • Highest possible technical quality • Lowest possible reduction in air quality within the workplace • Maximum protection of the environment. Strict adherence to these principles guarantees that METAFLUX products will stay in the topmost international group now and in the future.

We recommend NSF approved products not only to the food and drinks industry, animal feed producers and the medical sector, but also to companies who place a high value on human-friendly approved products! The merger of German and Swiss production and sales companies represent an international trade-mark which puts three main principles in the foreground on a worldwide basis. Metaflux products are worth the money! Judge our high standards personally and let yourself be inspired by our Metaflux.

75-77 UNIVERSAL CLEANER

NSF APPROVED CLEANER

MULTI-PURPOSE SOLUBLE DEGREASER

Content	Type	Art.-No	pH	Color	
1 l.	liquid	75-7701	11.5	Pink	12
4 l.	liquid	75-7704	11.5	Pink	4
20 l.	liquid	75-7720	11.5	Pink	1

Nonfood Compounds
Program Listed H1
Registration # 141865

For the cleaning of industrial and mechanical equipment as well as for vehicles, engines, sign-boards, facades, fittings, heating plants, kitchen installations and in general for degreasing metal and stainless-steel surfaces, also for the removal of algae deposits on stone, synthetics and metal. Spray soiled parts, leave for short time to act, wipe off or spray off.

- Not flammable
- Free of solvents requiring declaration (authorisation).
- Biologically degradable in accordance with EC Regulations.
- Not subject to the quick separation directive (for oil separators)
- Dilute with water, 1 : 40 – according to purpose used.
- Contains corrosion inhibitor for short-term

74-50 UNIVERSAL CLEANER SPRAY

NSF APPROVED CLEANER IN SPRAY

MULTI-PURPOSE SOLUBLE DEGREASER NON-FLAMMABLE

Contenu net	Type	Art.-No	pH	flammable	
400ml.	aérosol	74-50	10	no	12

Nonfood Compounds
NSF A1
Registration # 164107

Greenline Spray Universal Cleaner and Degreaser is designed to remove mineral and vegetable oils and greases, cutting oils and emulsions, inks, paints, carbon black, resins, waxes, nicotine, proteins, and other impurities industries of steel, stainless steel, glass, plastic, concrete surfaces, wood, stone, ceramics, and others.

- The world's first safe cleaning spray without GHS hazard symbols
- Environmentally friendly products. Biodegradable products
- Does not require the employer to train employees to work with flammable and dangerous substances
- Safe, non-flammable and non-irritating product
- Products made from entirely raw materials recyclable of natural origin

71-55 FOODLUB GREASE 200

NSF APPROVED LUBRICANT GREASE

HIGH QUALITY GREASE FOR FOOD INDUSTRIES

Content	Type	Color	Temperature resistance	Art.-No	
400g	tube	colorless	-20 ° C to 200 ° C	71-55	12

Nonfood Compounds
Program Listed H1
Registration # 145240

All mechanical equipment in all branches of the food and beverage industry. Eg.: brewing, distilleries, wineries, catering establishments, clinics, hotels, bakeries, laboratories, milking and newspaper equipment, grain factories. To be used in all operations of food processing, including blending, cooking, frying, cooking, cleaning, packaging, canning and bottling. Application examples: Measuring components, friction bearings, roller bearings, guide rods, ball bearings, stampings, ball bearings, tubular tracks, treadmills, faucets, valves, etc.

- High quality, high temperature lubrication.
- Protection against wear, tear AND corrosion in all branches of the food & drinks industry.
- Formulated for increased resistance to water.
- Excellent resistance to corrosion
- NLGI-Class 2 according to ASTM D-217.
- ASTM D-566 drop point: 318 ° C.

70-09 / 71-09 BIOLUB

LUBRICANT PASTE AND SPRAY

SPECIAL LUBRICANT FOR FOOD INDUSTRIES

Content	Type	Art.-No	Color	Temperature resistance	Density	
400 ml	spray can	70-09	colorless	-30°C to 120°C	15,5 mm ² /s	12
350g	pot	71-0935	beige	-40°C to 120°C	0,90 g/cm ³	12
400g	tube	71-0940	beige	-40°C to 120°C	0,90 g/cm ³	12

- Special lubricant for the whole food industry
- Free of plant and animal fats (will not go rancid)
- Not soluble in water, capillary effect
- Tasteless, odourless, colourless
- Not skin irritant

Nonfood Compounds
Program Listed H1
Registration # 141652

70-74 SUPRALUB

ADHESIVE LUBRICANT/CHAIN SPRAY

SPECIAL LUBRICANT WITH ANTICORROSION PROTECTION

Content	Type	Art.-No	Color	Temperature resistance	Viscosity	
400 ml	spray can	70-74	colorless	-5°C to 200°C	70 mm ² /s	12

- Odour and taste neutral
- Highly refined/water white
- Good oxidization and ageing stability
- Corrosion protection
- Simultaneously cleans, protects and cares
- Reduces friction and wear
- Silicone-free

Nonfood Compounds
Program Listed H1
Registration # 141652

70-48 HT-LUB

HIGH TEMPERATURE LUBRICANT

SPECIAL LUBRICANT WITH ANTICORROSION PROTECTION

Content	Type	Art.-No	Color	Temperature resistance	
400 ml	spray can	70-48	grey	-40°C to 1400°C	12

- Prevents galling and cold welding effects.
- Resistant to hot / cold water, acids and brines.
- Good protection against corrosion and wear out
- Protects from oxidation.
- Does not contain metal

Nonfood Compounds
Program Listed H1
Registration # 141653

70-64 SILICON SPRAY

SLIDE & SEPARATING AGENT

SPECIAL LUBRICANT WITH SILICONE

Content	Type	Art.-No	Color	Temperature resistance	Thickness	
400 ml	spray can	70-64	colorless	-45°C to 220°C	0.690 g/cm ³	12

- Universal slide and separating agent for use in the whole food industry
- Produces new shine
- Acts antistatically
- Prevents hardening, freezing and sticking of rubber components
- Protects electro-contacts from dampness

Nonfood Compounds
Program Listed H1
Registration # 141653

76-00 AMETA CLEAN

◀ WATER SOLUBLE DEGREASER

DÉGRAISSANT BIODÉGRADABLE MULTI-USAGE

Content	Type	Art.-No	pH	Flammable	
960 ml [32.46 fl.oz.]	sprayer	76-0001	12.7	no	12
4 l [1.06 gal.]	pot	76-0004	12.7	no	4
20 l [5.28 gal.]	pot	76-0020	12.7	no	1
205 l [54.15 gal.]	barrel	76-0045	12.7	no	1

Cleans and removes grease and oil from equipment, industrial and private surfaces. Recommended for farming vehicles, trucks, construction equipment, ships, etc. Also recommended as cleaner/degreaser for barbecues (rinse well with water).

◀ WATER SOLUBLE DEGREASER

BIODEGRADABLE CLEANER

DOUBLE CONCENTRATION

Content	Type	Art.-No	pH	Flammable	
960 ml [32.46 fl.oz.]	sprayer	76-3101	12.7	no	12
4 l [1.06 gal.]	pot	76-3104	12.7	no	4
20 l [5.28 gal.]	pot	76-3120	12.7	no	1
205 l [54.15 gal.]	barrel	76-3145	12.7	no	1

Cleans and removes grease and oil from equipment, industrial and private surfaces. Recommended for farming vehicles, trucks, construction equipment, ships, etc. Also recommended as cleaner/degreaser for barbecues (rinse well with water).

◀ HIGH PRESSURE MACHINE DEGREASER

NO RUBBING CONCENTRATED CLEANER

Content	Type	Art.-No	pH	Odor	
960 ml [32.46 fl.oz.]	sprayer	76-9401	10.5 - 11.5	citrus	12
4 l [1.06 gal.]	pot	76-9404	10.5 - 11.5	citrus	4
20 l [5.28 gal.]	pot	76-9420	10.5 - 11.5	citrus	1
205 l [54.15 gal.]	barrel	76-9445	10.5 - 11.5	citrus	1

Produces an active foam that acts in hot or cold water, soft or hard and rinses easily. The action of the solvent removes residues, tar, insect deposits, carbonized deposits from truck exhaust pipes and other rolling vehicles. Ideal for general washing of floors and other surfaces.

74-10 ECOLOGIC WATER BASED DEGREASER

◀ WATER-BASED DEGREASER

ECOLOGICAL DEGREASER FOR TUBS WASHING

Content	Type	Art.-No	Color	Exempted according to	Odor	
960 ml [32.46 fl.oz.]	sprayer	74-1001	colorless	COV. 2010/75 / UE	apple	12
4 l [1.06 gal.]	pot	74-1004	colorless	COV. 2010/75 / UE	apple	4
20 l [5.28 gal.]	pot	74-1020	colorless	COV. 2010/75 / UE	apple	12

Cleaner with water-based micro-organisms that removes effectively daily dirt, particularly effective for oil particles, grease, abrasion dust, smoke and soot. Very long life span (up to 8 months). For use in workshops, industries and garages.

76-93 BETON-MAX

76-87 DEC'ALU

ACID CLEANERS

BIODEGRADABLE ACID DEGREASER

Content	Type	Art.-No	pH	Flammable	
960 ml [32.46 fl.oz.]	sprayer	76-8601	2-3	no	12
4 l [1.06 gal.]	pot	76-8604	2-3	no	4
20 l [5.28 gal.]	pot	76-8620	2-3	no	1
205 l [54.15 gal.]	barrel	76-8645	2-3	no	1

Intended for cleaning and polishing aluminum tanks and stainless steel surfaces. Aluminum boats, pontoons, stainless steel props, masts & booms, fishing towers, outriggers.

POWERFUL ACID CLEANERS

POWERFUL SOLUBLE ACID CLEANER

Content	Type	Art.-No	force	pH	
500 ml	sprayer	75-2900	strong	2.5	12
10 l	pot	75-2910	strong	2.5	4
20 l [5.28 gal.]	pot	75-2920	strong	2.5	1
500 ml	sprayer	75-3000	very strong	1	1
10 l	pot	75-3010	very strong	1	1
20 l [5.28 gal.]	pot	75-3020	very strong	1	1

Cleans heavy stains such as cement and limescale blooms, urine stone, rust, algae marks, including on brass and copper. Also acts of heavy stains from grease, oil, albumen, watermarks, and dark patches of mildew. Has a germ-inhibiting, antibacterial action. Not suitable for marble and limestone. Areas of use: Industry, craft trades, food and drink operations.

ACID CLEANERS CONCRETE MIXER TRUCKS

ACID STRIPPER FOR THE CONCRETE INDUSTRY

Content	Type	Art.-No	pH	Flammable	
960 ml [32.46 fl.oz.]	sprayer	76-9301	1	no	12
4 l [1.06 gal.]	pot	76-9304	1	no	4
20 l [5.28 gal.]	pot	76-9320	1	no	1
205 l [54.15 gal.]	barrel	76-9345	1	no	1

Easily dissolves concrete from concrete mixers and floor flatters. It also removes grease, oil, rust deposits and most dirt from concrete mixers without damaging the paint if used as directed.

ACID CLEANER / STRIPPER

HIGHLY CONCENTRATED ACID STRIPPER (WHITENING)

Content	Type	Art.-No	pH	Flammable	
960 ml [32.46 fl.oz.]	sprayer	76-8701	1	no	12
4 l [1.06 gal.]	pot	76-8704	1	no	4
20 l [5.28 gal.]	pot	76-8720	1	no	1
205 l [54.15 gal.]	barrel	76-8745	1	no	1

Washing product for noble metals such as copper, aluminum, chromium, magnesium, etc. Its double-action formula allows it to be an excellent product for bleaching aluminum. This product is biodegradable, however, we do not recommend cleaning boats or other watercraft close to lakes or rivers to prevent runoff from the product into water.

76-46 REMOVER 76-49 REMOVER ÉCO

SOLVENT BASED DEGREASER

4 l [1.06 gal.]	pot	76-4604	7	yellow	4
20 l [5.28 gal.]	pot	76-4620	7	yellow	1
205 l [54.15 gal.]	barrel	76-4645	7	yellow	1
960 ml [32.46 fl.oz.]	sprayer	76-4901	7	orange	12
4 l [1.06 gal.]	pot	76-4904	7	orange	4
20 l [5.28 gal.]	pot	76-4920	7	orange	1
205 l [54.15 gal.]	barrel	76-4945	7	orange	1

Neutral degreaser based on citrus extracts for fast removal of stubborn oil, grease and adhesive residues, bitumen, lubricants, resins, rubber abrasions etc. Efficiently removes tar, bitumen, tree sap, asphalt deposits and paint drips. Ideal for contractors, municipalities and shops. Works as excellent degreaser for engines, garage and concrete floors.

75-27 / 75-17 / 75-88 / 75-60 CITRUS CLEANER

SOLVENT BASED DEGREASER

HIGHLY CONCENTRATED NEUTRAL UNIVERSAL DEGREASER

Content	Type	Art.-No	pH	Flammable	
400 ml	spray can	75-17	7	yes	12
400 ml	spray can GEL	75-88	7	yes	4
400 ml	spray can NSF	75-60	7	yes	4
960 ml [32.46 fl.oz.]	vrac	75-2700	7	yes	12

To remove oil, grease, glue, tar, silicone, resin and rubber residues from tools and washable surfaces. Efficient against pen, pencil and fiber markers writings on surfaces and color stains. Adhesive residues on glass surfaces, window frames etc.

76-05 TOB CLEAN

SOLVENT BASED DEGREASER

TUBS WASHING CLEANER

Content	Type	Art.-No	Density	Odor	
960 ml [32.46 fl.oz.]	sprayer	76-0501	0.78 - 0.81	odorless	12
4 l [1.06 gal.]	pot	76-0504	0.78 - 0.81	odorless	4
20 l [5.28 gal.]	pot	76-0520	0.78 - 0.81	odorless	1
205 l [54.15 gal.]	barrel	76-0545	0.78 - 0.81	odorless	1

Solvent-based special degreaser for wash tubs. Also suitable for cleaning pieces, surfaces and parts covered with dry oil or grease. **Practically odorless, Long-lasting, No harmful vapors.**

79-15 / 79-02 BRAKE CLEANER

SOLVENT BASED DEGREASER

BRAKE CLEANER DEGREASER WITH FAST/INSTANT DRYING

Content	Type	Art.-No	Density	Odor	
400 ml	spray can	79-02			
960 ml [32.46 fl.oz.]	sprayer	79-1501	0.78 - 0.81	inodore	12
4 l [1.06 gal.]	pot	79-1504	0.78 - 0.81	inodore	4
20 l [5.28 gal.]	pot	79-1520	0.78 - 0.81	inodore	1
205 l [54.15 gal.]	barrel	79-1545	0.78 - 0.81	inodore	1

Removal of oil and dirt from: brake discs, all brake parts, engines mechanical parts, machines. Quick action and penetration, Not corrosive, Very powerful dissolvent of sticking break dust.

* Scan the QR code of the product to see the technical data sheet and much more information. You can download the app(free) that can read QR codes on any smart phone.

70-33 SEALANT & ADHESIVE

ADHESIVE & SEALANT REMOVER

FOR REMOVAL OF CYANOACRYLATE AND ANAEROBIC GLUES

Content	Type	Art.-No	Corrosif	working time	
400 ml	spray can	70-33	no	5 to 15 min.	12

- For cyanoacrylate and anaerobic glues
- Works well as paint residue remover
- No-drip gel formula
- Simple and effective to use

70-15 RAPID CLEANER

FAST CLEANING SPRAY

RESIDUE-FREE DEGREASING

Content	Type	Art.-No	Corrosive	Drying	
400 ml	spray can	70-15	no	instant	12

- Quick cleaning, with no harmful vapors
- No-irritant
- Fully residue-free degreasing
- Specially recommended for cleaning brakes, oil-burners and electronic circuits
- Does not attack rubber or plastics

70-91 CONTACT SPRAY

ELECTRIC CONTACT CLEANER/PROTECTOR

DISSOLVES, DISPLACES, SECURES, LUBRICATES, MAINTAINS

Content	Type	Art.-No	Corrosive	vapor	
400 ml	spray can	70-91	no	no	12

- Quick cleaning, with no harmful vapors
- No-irritant
- Fully residue-free degreasing
- Specially recommended for cleaning brakes, oil-burners and electronic circuits
- Does not attack rubber or plastics

76-47 AMETA EXTRA

ORANGE POWDER DEGREASER

FOR CONCRETE FLOORS DEEP CLEANING

Content	Type	Art.-No	Odor	Color	
20kg	powder	76-47	N.A.	orange	12

- Powerful orange powder degreaser
- For industrial use only
- Simple to use
- Economic
- Pleasant orange odor
- Penetrates into the oil/grease stain

75-56 / 70-55 SST CLEANER

< STAINLESS-STEEL CLEAN & CARE

HIGH-PERFORMANCE SPECIAL CARE PRODUCT FOR STAINLESS STEEL

Content	Type	Art.-No	Color	Density	
400ml.	spray can	70-55	colorless	0,695 g/cm3	12
500ml.	sprayer	75-5600	colorless	0,797 g/cm3	24
960 ml [32.46 fl.oz.]	sprayer	75-5601	colorless	0,797 g/cm3	12
4 l [1.06 gal.]	pot	75-5604	colorless	0,797 g/cm3	4
20 l [5.28 gal.]	pot	75-5620	colorless	0,797 g/cm3	1

Description: High-performance special care product for stainless steel and stoves and smooth plastic surfaces in commercial kitchens, gastro-engineering, kitchen-making, hospitals, foodstuff companies, elevators, benches, chrome-nickel processing companies, catering, etc.

75-44 CLEAN-NOX

< STAINLESS STEEL GEL CLEANER

POWERFUL DETERGENT GEL FOR STAINLESS STEEL

Content	Type	Art.-No	pH	Flammable	
960 ml [32.46 fl.oz.]	sprayer	75-4401	1.5	no	12
4 l [1.06 gal.]	pot	75-4404	1.5	no	4
20 l [5.28 gal.]	pot	75-4420	1.5	no	1
205 l [54.15 gal.]	barrel	75-4445	1.5	no	1

Highly effective cleaning gel for all stainless steel, aluminum and non-ferrous metal surfaces. Removes deposits such as limescale and cement bloom, extraneous rust, paint runs, welding scale and light grease and oil marks.

75-26 RUST KILLER

< CORROSION REMOVER/CLEANER

FOR SLIGHTLY RUSTED PIECES

Content	Type	Art.-No	Soluble	Flammable	
960 ml [32.46 fl.oz.]	sprayer	75-2601	yes	no	12
4 l [1.06 gal.]	pot	75-2604	yes	no	4
20 l [5.28 gal.]	pot	75-2620	yes	no	1
205 l [54.15 gal.]	barrel	75-2645	yes	no	1

Special cleaning agent with rust removing capacity for parts and surfaces that are lightly or moderately affected by initial surface corrosion. Maintenance and repair shops. Removes rust and corrosion on detached parts, tools, and metal surface. Recommended for re-conditioning of old parts and general maintenance.

* Scan the QR code of the product to see the technical data sheet and much more information. You can download the app(free) that can read QR codes on any smart phone.

70-66 STAINLESS STEEL PICKLING & POLISHING PASTE

PICKLING PASTE

FOR CHROME-NICKEL-STEEL STRIPPING

Content	Type	Art.-No	Corrosive	working time	
330g.	paste	70-6633	yes	less than 5 min.	12

- Stainless steel pickling product
- For chrome-nickel-steel
- For preventive removal of:
Paint runs, Patches of rust, Residues of adhesive

77-03 BIO-ZONE

DOMESTIC ALL PURPOSE CLEANER

FOR DOMESTIC USE

Content	Type	Art.-No	pH	Flammable	
960 ml [32.46 fl.oz.]	sprayer	77-0301	8-9	no	12
4 l [1.06 gal.]	pot	77-0304	8-9	no	4
20 l [5.28 gal.]	pot	77-0320	8-9	no	1
205 l [54.15 gal.]	barrel	77-0345	8-9	no	1

Its cleansing action removes organic dirt and odors in an irreversible way. Its efficacy has been validated according to general Canadian standards (CGSB (F) 2-GP-11M). Bio-Zone contains no solvents and does not release harmful and flammable vapors, its pH is neutral and is completely biodegradable According to OECD 301 E. It is approved by Health Canada for safe use.

76-03 BIO-ZONE+

FOOD INDUSTRY CLEANER

FOR INDUSTRIAL USE

Content	Type	Art.-No	pH	Flammable	
960 ml [32.46 fl.oz.]	sprayer	76-0301	8-9	no	12
4 l [1.06 gal.]	pot	76-0304	8-9	no	4
20 l [5.28 gal.]	pot	76-0320	8-9	no	1
205 l [54.15 gal.]	barrel	76-0345	8-9	no	1

Cleaner degreaser, deodorizer, 100% biological based enzymes. It does not contain any Solvents and does not emit harmful and flammable vapors, its pH is neutral and is completely biodegradable according to OECD 301E. Thus, Bio-Zone + offers a safe alternative to chemical solvents, thus eliminating health risks and the requirement to dispose of waste that is toxic to the environment.

75-83 ODORS NEUTRALIZER

ODORS FRESHENER / NEUTRALIZER

CREATES A FRESH AND FRUITY SCENT

Content	Type	Art.-No	Odor	
400 ml	spray can	75-83	fruity	12

- Eliminates unpleasant odors
- Fresh and fruity scent
- Long-lasting, long-lasting product
- No-toxic
- Effective even for large spaces thanks to the TURBO JET

74-94 V-SECURE

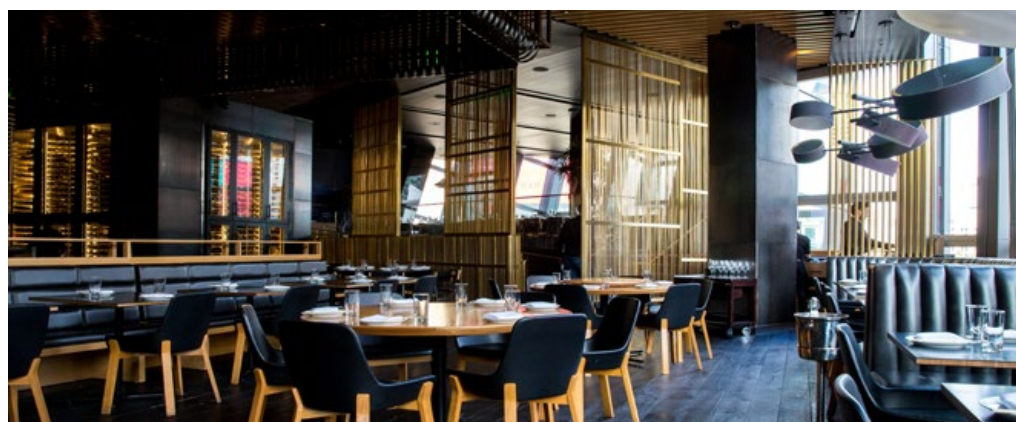

< CLEANER WITH HYGIENIC ACTION

ANTIBACTERICIDE DETERGENT

Content	Type	Art.-No	pH	Dilution	
960 ml [32.46 fl.oz.]	spray	74-9401	10	yes 10:1	12
4 l [1.06 gal.]	bottle	74-9404	10	yes 10:1	4
20 l [5.28 gal.]	bottle	74-9420	10	yes 10:1	1
205 l [54.15 gal.]	tob	74-9445	10	yes 10:1	1

Reliably clean steel, tiles, wood, plastic and all other washable surfaces. Eliminates micro-organisms from contaminated surfaces. Thanks to its degreasing properties, it acts on the lipid membrane of viruses and dissolves it, making surfaces hygienically clean. VOC FREE, non-flammable & non-abrasive.

74-95 V-SECURE GLASS

< CLEANER WITH HYGIENIC ACTION

ANTIBACTERICIDE DETERGENT FOR GLASS

Content	Type	Art.-No	pH	Dilution	
960 ml [32.46 fl.oz.]	spray	74-9501	11.4	no	12
4 l [1.06 gal.]	bottle	74-9504	11.4	no	4
20 l [5.28 gal.]	bottle	74-9520	11.4	no	1
205 l [54.15 gal.]	tob	74-9545	11.4	no	1

Reliably cleans all glass surfaces, polycarbonate, acrylic, plastic, and all other washable surfaces. Eliminates micro-organisms from contaminated surfaces. Thanks to its degreasing properties, it acts on the lipid membrane of viruses and dissolves it, making surfaces hygienically clean. Ready to use: quick-drying and does not leave a mark.

Intended for professional protection of leather upholstery in cars, trucks, vans, motorhomes, boats, homes, offices, etc. **76-1301:** Special liquid intended for professional protection of leather upholstery. It contains an oil base for an excellent spreading on any leather surfaces and long-lasting protection. **77-04:** Thanks to its ideal composition of 100% biological surfactants and enzymes, it safely removes grease stains and organic soils from all leathers. Indeed, it acts at depth and on the surface without altering or modifying the appearance of the surface to be cleaned and without leaving oily or sticky residues.

NATURAL solvent free hand cleaners

Macrocream and Sendy wipes are 100% natural and solvent-free industrial hand cleaners. Made for professionals looking for advanced products that fully respect the human skin, as well as the environment, while providing the best cleaning action ever.

Macrocream and Sendy wipes maintain the skin pH value and are therefore the products recommended to people with skin problems who need to wash their hands several times a day. North American professionals now have access to unique hand cleaners made in Italy by Nettuno, leader in solvent-free hand detergents.

Metaflux hand cleaning and protection products represent the pinnacle of the "made in Germany" quality product range. Dermatologically tested, these products are free of toxic agents and provide features exceeding typical standards.

HAND CLEANSING CREAM WITH NATURAL
MICROSPHERES

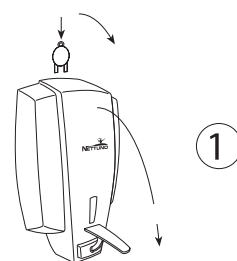

3 000 ml [0.79 gal.] Macrocream T-Bag Refill
Bag size:H. 340 mm x W. 260 mm The T-Bag refill is
intended as a one-size refill for both the T-Box pump
and T-Big wall dispenser.

Macrocream is a 100% natural and solvent-free creamy
hand cleanser with unique detergent and softening
properties. The washing base is a combination of
solvent-free and skin-friendly ingredients providing a
highly effective detergent action against any kind of dirt.

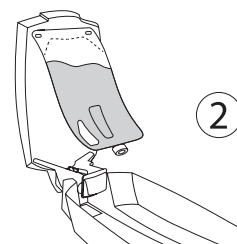

Macrocream also contains fine microspheres of vegetable
origin that strengthen its cleansing action. Thanks to
the same pH value as the human skin, it can be used as
often as needed without causing any reddening of the
skin. 3000 ml Macrocream with glycerin is enough for
1000 hand washing operations to remove both greasy
and dry dirt.

RANGE OF APPLICATIONS

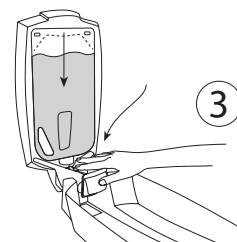

Grease, oil, hydrocarbons, bitumen, paint, enamel,
silicone, adhesive, resin and graphite.
