

S-SECURE

77-80

Metaflix®
Technical Data Sheet

DESCRIPTION:

Gives a beautiful appearance to façades, borders, roofs, and walls, while ensuring perfect cleanliness of surfaces. Suitable for both indoor and outdoor surfaces, including silicone joints. Can be used on equipment in the food and agri-food sectors. Eliminates: algae, mold, germs, bacteria, viruses, yeasts, and tarnish. Maintenance of outdoor spaces, building renovation companies, cleaning companies, businesses in the agri-food sector, agricultural operations, health sector, public restrooms, toilets, showers, sinks, swimming pools, saunas, spas...

USE DIRECTIVES:

S-SECURE can be used undiluted or diluted* up to 1:10, depending on the area of application. The action duration is typically between 10 to 30 minutes, but it can last up to 8 hours for extreme cases. Repeat the process for severe soiling. Once the reaction is complete, rinsing with water may be done depending on the use. Due to mineral-based components, a residue may remain after drying.

Non-flammable. Check compatibility with sensitive materials beforehand.

*Mix only with water and never dilute with other chemicals.

Store in a cool, dark place in the original container, if possible. Protect from sunlight.

Follow the safety instructions mentioned on the label.

PROPERTIES AND BENEFITS:
